### What is Gymfinity GO!?

Gymfinity GO! (GO=Gymfinity Online) is a fun and interactive way for your gymnast(s) to stay active when they are away from the gym. The program is completely online and will lead a gymnast through stretches and exercises to allow them some physical activity while they are home bound.

### What are my options?

Gymfinity GO! is a Gymfinity online program with customized curriculum for our recreational classes and teams. It includes weekly videos, challenges, and other curriculum. GO! includes content for:

- **Preschool (ages 18 mos to 4 years)** - with a video sent home each week, your child can follow along and get a good workout. This class includes coloring sheets, puzzles or other academic work that can give them activity time aside from the physical. The video can be watched everyday for exercise, and each week has a Mom and Dad challenge. *The tuition for this program is \$40/month.*
- **Gymnastics and Tumble & Trampoline (5-17 years old)** - a program that allows kids to have a healthy dose of activity and challenge to keep them moving once, twice or every day of the week. You don't need a trampoline to benefit from this program and everything can be done at home or in the yard. *The tuition for this program is \$50/month.*
- **Ninja Warrior (4-12 years old)** - this program, separate from the class program for Gymnastics/T&T, combines exercise, aerobic workouts, and drills for skills the kids can practice without climbing up your walls. *The tuition for this program is \$50/month.*
- **Team Training** - Only available to our current team athletes, weekly, the gymnasts will receive 4 workouts to complete. They are divided into 3 tiers, based on their level. This program also includes admission to a private Facebook group that allows kids (and their parents, of course) to chat with each other and receive feedback from coaches. The private channel may also feature some drills for skills submitted by coaches and directed to their group, which allows personalized training within the larger group. This is an optional piece and parents, you decide if your athlete may participate. *Tuition for the team training program is \$100/month.*

### Why Gymfinity GO!?

We've seen an enormous outpouring of support over the past few weeks from families asking how they can help. We are passionate about keeping kids active and also, it's a necessity for us. While Gymfinity is closed for classes, there is no cash flow coming in. A business without income cannot meet its financial obligations. We are trying to provide jobs for our staff through this crisis and we need cash to keep them on board. Therefore, we are offering classes at home.

### 2 other important things to know!

- Signing up for this program also gives you "Gymfinity Bucks", as a credit on your account. With each month you register for, you get a credit of Gymfinity Bucks applied to your account; \$5 per month for Preschool, \$10/month for all Recreational Classes, and \$15 per month for team. Your Gymfinity Bucks stay in your family account until we return to classes at the gym when they will be applied over the next 4 months as credit toward your tuition. This gives you activity now, and credit toward classes at Gymfinity later. Win-win!
- Additionally, there has also been a few families asking how they can help others. There are some families particularly hard hit by this virus pandemic and may have very significant economic hardship including no income to the household. Therefore, Gymfinity is allowing families to voluntarily donate more than their tuition each month. You'll have the opportunity when you register. Any money paid above a child's tuition will be applied toward helping another child, whose family might be financially stressed, to participate.

Lessons start on March 25th and renew each Monday. Register here through your [Parent Portal](#). Just search for "Gymfinity GO" and choose the class that's right for your child(ren).

Thank you so much for your support!
